7. Technical Framework Conditions

Questions regarding technical equipment and technical support during the residency should be discussed in advance with the Brunnenpassage team. Preference will be given to those projects that can work independently in the space and require little technical support. All artists are responsible for their own installation and dismantling. The artists themselves must bring the necessary tools and equipment along. Equipment from Brunnenpassage can be used occasionally after consultation.

I hereby consent to the mention of my name in the public relations work of the Brunnenpassage, in case I am accepted for a residency.

I hereby agree to the data protection declaration of Brunnenpassage (see website impressum).

If a residency is granted, the signing of the user agreement (specified measures to contain the spread of the Covid19 virus) is a prerequisite for commencement of the residency. The safety of all employees and artists has priority. Any short-term changes regarding new government measures to contain Covid 19 must be followed.
